Experience/Projects

Freelance Web Developer

Self-employed | Date - Present

- Developed and deployed several web applications using React.js, HTML, CSS, and JavaScript.
- Integrated third-party APIs and services like Firebase for real-time data management and authentication.
- Designed responsive user interfaces ensuring compatibility across devices using Material-UI and Tailwind CSS.
- Collaborated with clients to understand their project needs, deliver custom solutions, and troubleshoot issues.

Personal Projects

- **Doctor Appointment System UI:**

Built a full-fledged UI for a medical appointment booking system using React.js and Material-UI, enabling users to book, view, and manage appointments.

- **YouTube App UI:**

Developed a responsive YouTube clone interface, utilizing React.js for dynamic video browsing and searching functionalities.

- **Chat Application:**

Created a real-time chat application with Firebase and React.js, implementing user authentication, messaging, and chat history features.

Code Contributions

- Contributed to open-source projects on GitHub to improve coding skills and collaborate with developers in the community.
- Participated in online coding challenges to sharpen problem-solving and development skills.
